

# HOW ARE YOU ASSEMBLING PUSH-LOK HOSE AND FITTINGS?

**Barb-Tech II is designed to work with Push-Lok style hose and fittings from 1/4" to 3/4" ID.** The tool has an easy to change mandrel system designed to hold a variety of Push-Lok and compatible barbed fittings, it develops up to 300 psi of insertion force to easily install even the toughest fittings while reducing the effort required by the operator to 1/3. At 1.9 lbs., the tool is portable and light weight for easy field service repairs yet rugged enough for repetitive production applications. The Barb-Tech II tool comes as a kit in a 15" long x 12" wide x 3" tall storage and carrying case with 2 male and 2 female mandrels to accommodate a

large range of straight fittings. There are extra compartments in the case to keep additional mandrels and/or fittings to take to the job.

**A REVOLUTIONARY NEW TOOL** that easily assembles Push-Lok style hose and fittings.

**WORKS WITH A VARIETY OF FITTINGS** using a changeable mandrel system. Application specific mandrel design services are available.

**PORTABLE** Take it to where the hose repair is. A convenient carrying case included, no additional tools required.

**SAVES YOU TIME** by utilizing a cleat style hose grip on a light weight hand operated system that produces up to 300 psi of fitting insertion force.

**REDUCES INJURIES** by reducing the forces required of your hands to almost a 1/3 as well as preventing over bent wrists, a common cause of (RSI)/(OOS) claims.
